

Future North Sea: Decommissioning

TAQA Decommissioning Programme

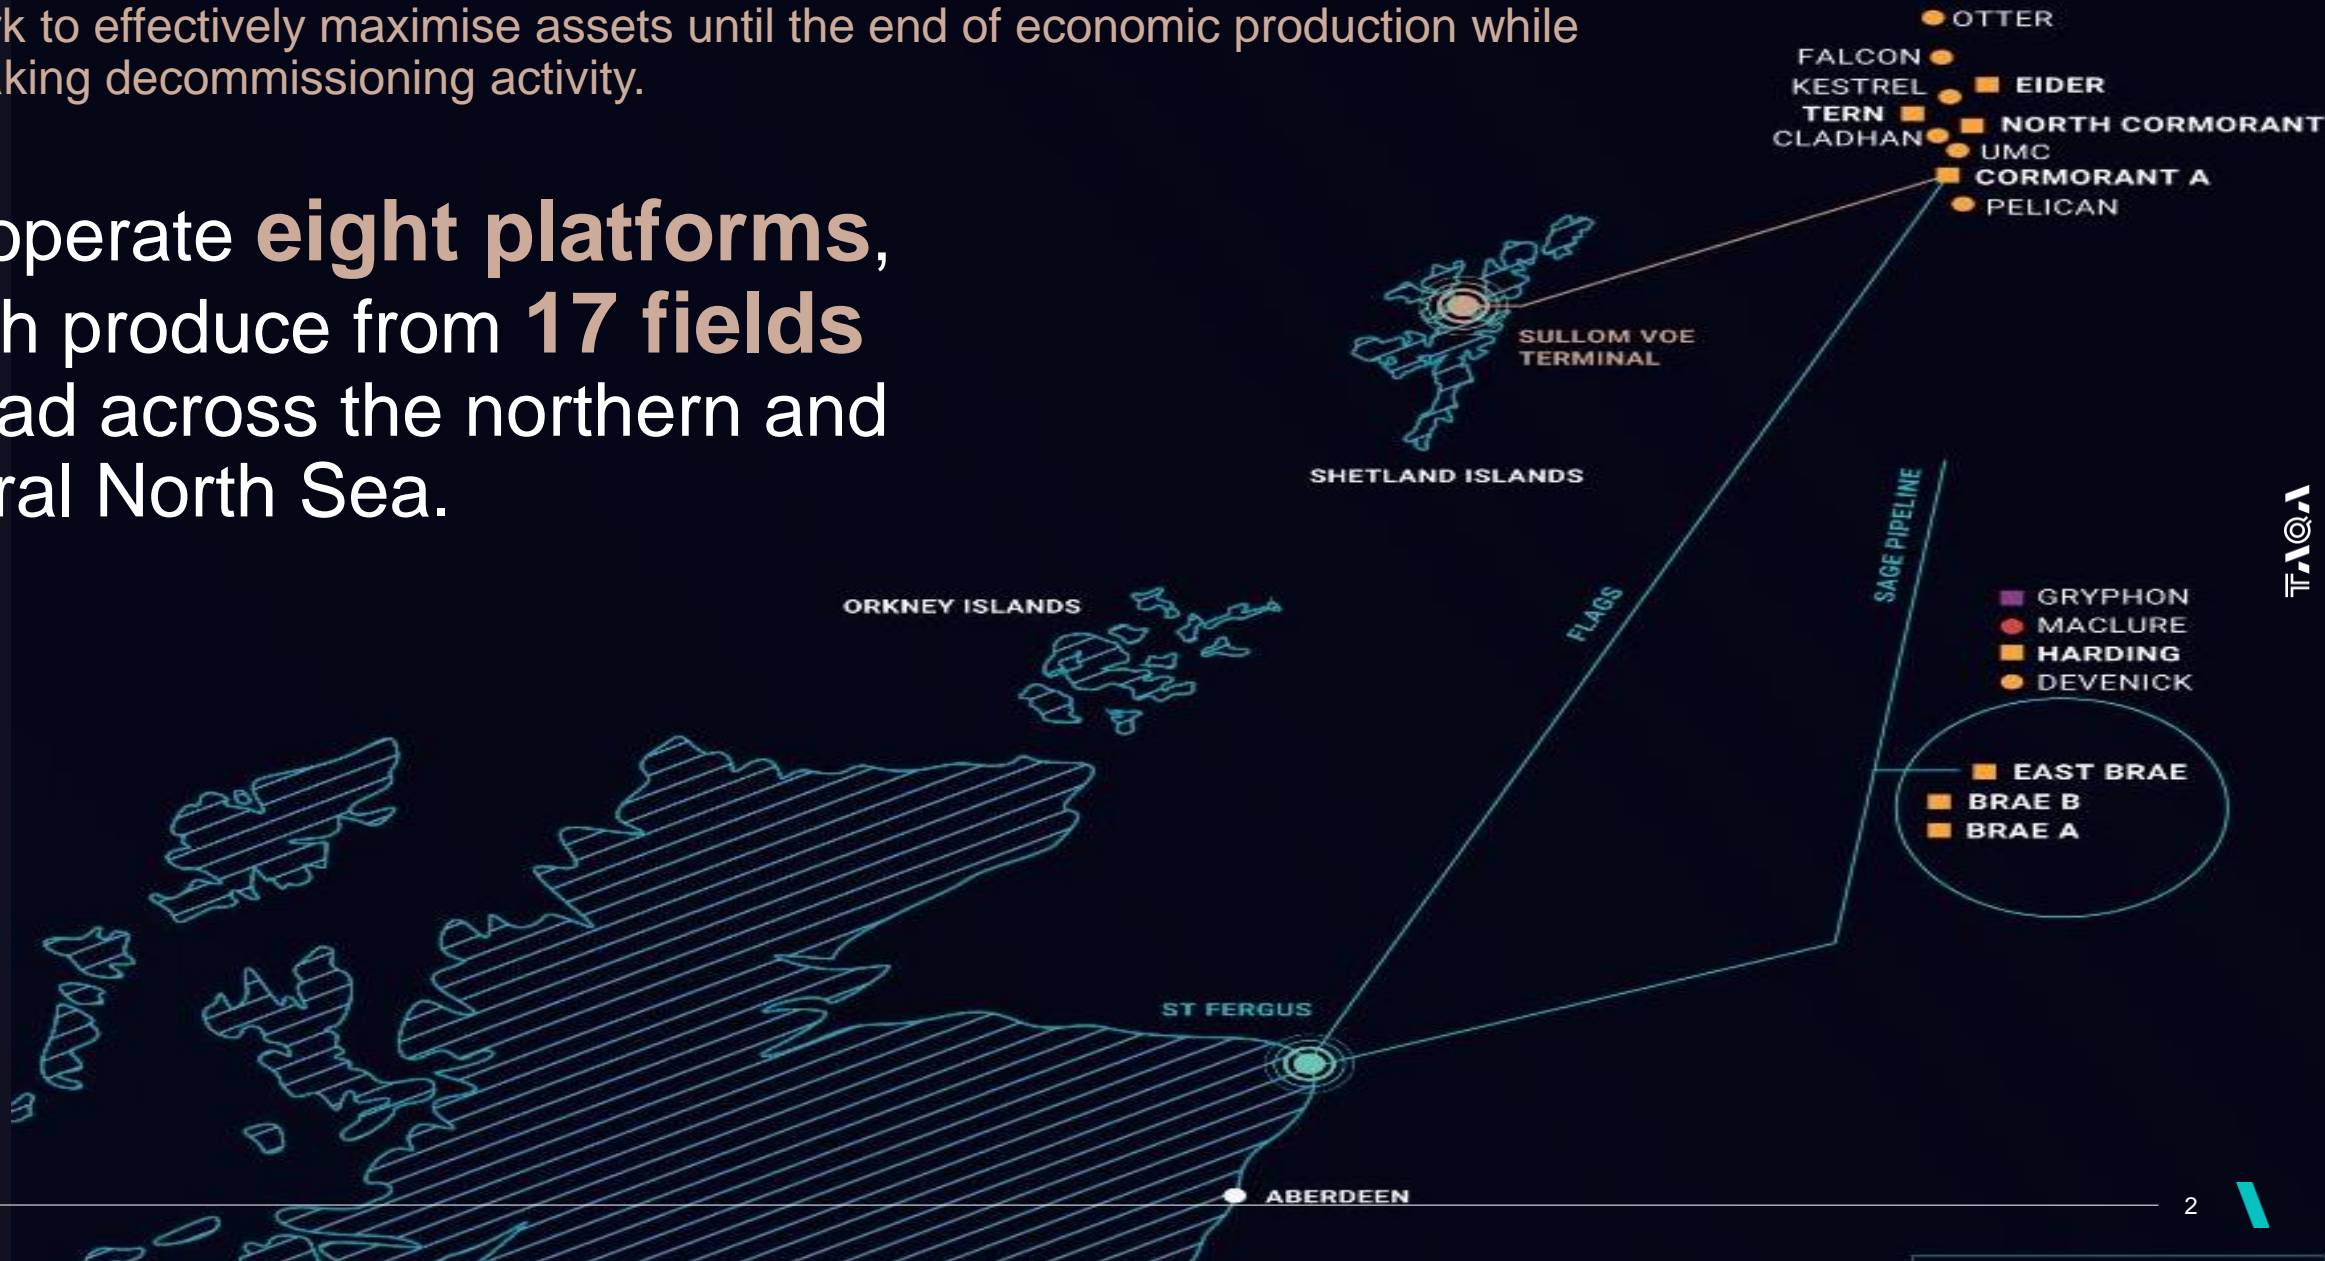

POWERING A THRIVING **FUTURE**

TAQA UK

We work to effectively maximise assets until the end of economic production while undertaking decommissioning activity.

We operate **eight platforms**, which produce from **17 fields** spread across the northern and central North Sea.

The Future of Decommissioning

Three key themes dominate TAQAs approach to late-life and decommissioning operations:

1

Delivering Value

2

Driving Performance

3

Building Capabilities

Delivering Value

TAQA recognises the responsibility that comes with stewarding such a substantial decommissioning programme and the different values associated with our activity.

The core of TAQA's decommissioning programme is to deliver value for:

Stakeholders

Industry

Society

Driving Performance

Taking execution to the next level

1

Pre-COP

2

Post-COP

3

Removal

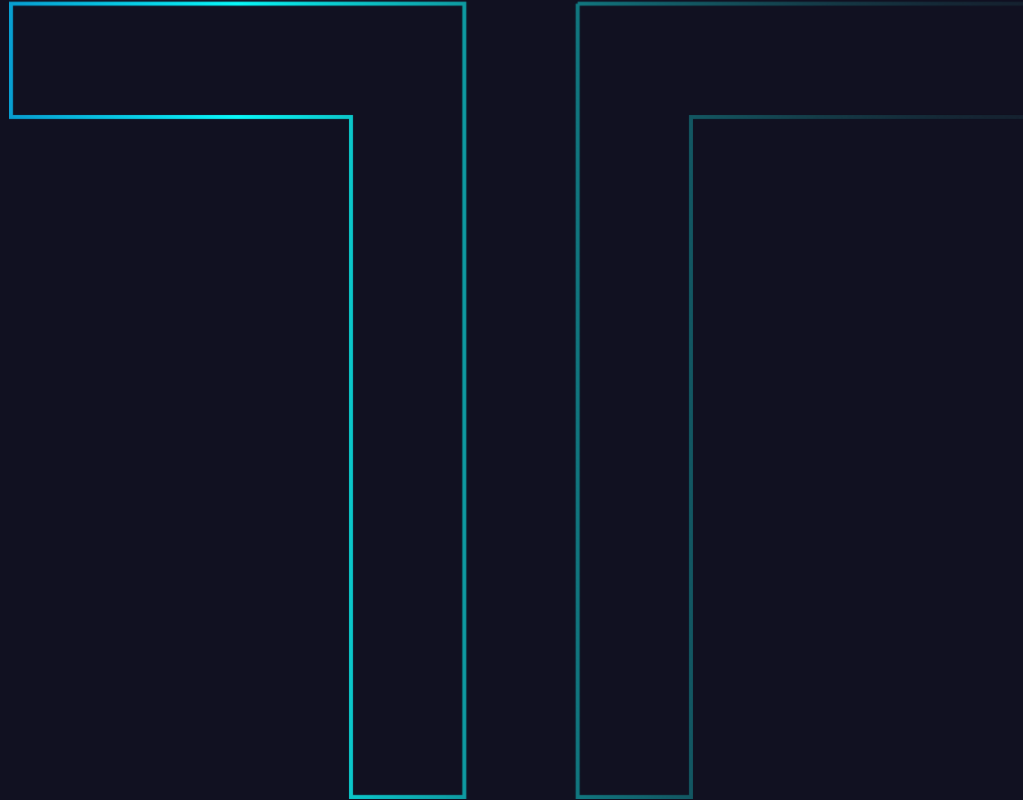

Building Capabilities

Developing a decommissioning blueprint, with the scale and continuity providing TAQA a unique opportunity

- Creating a **comprehensive** experience throughout the decommissioning process
- Building **strong** capabilities thanks to core decommissioning, well and project teams
- Establishing internal data bank for corporate **learnings**
- Streamlining approach to ensure **efficiency** within the programme
- Fostering robust supply chain **partnerships**

THANK YOU
