

MOVING DECOMMISSIONING FORWARD

By focusing on Integration and Transparency

CCO Jens Klit Thomsen
September 2021

Integrating decommissioning services

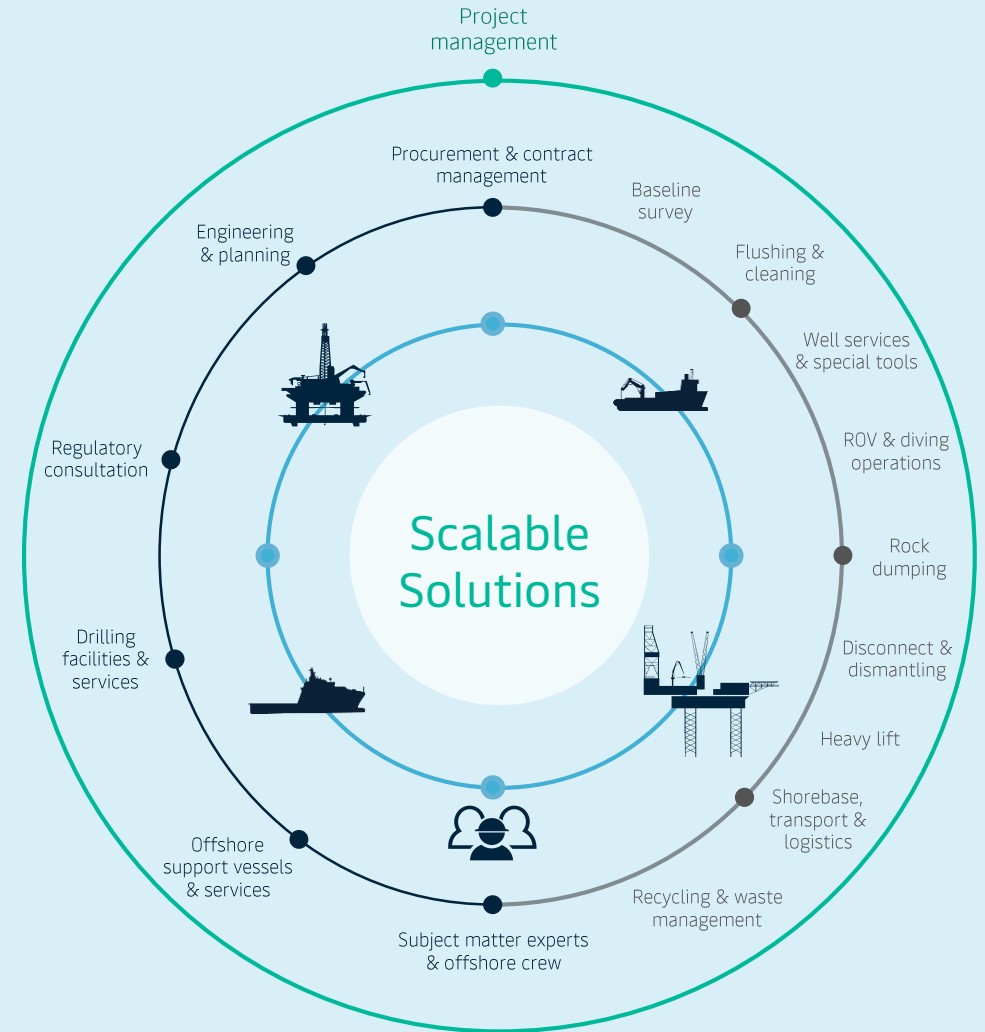

Ensure responsibility in the entire value chain

Minimise risk for operators

Cost control and certainty

Banda & Tiof project

Tullow in Mauritania

Maersk Decom will perform a General Visual Inspection (GVI)
of Tullow's Banda & Tiof field

Transparency is needed

1

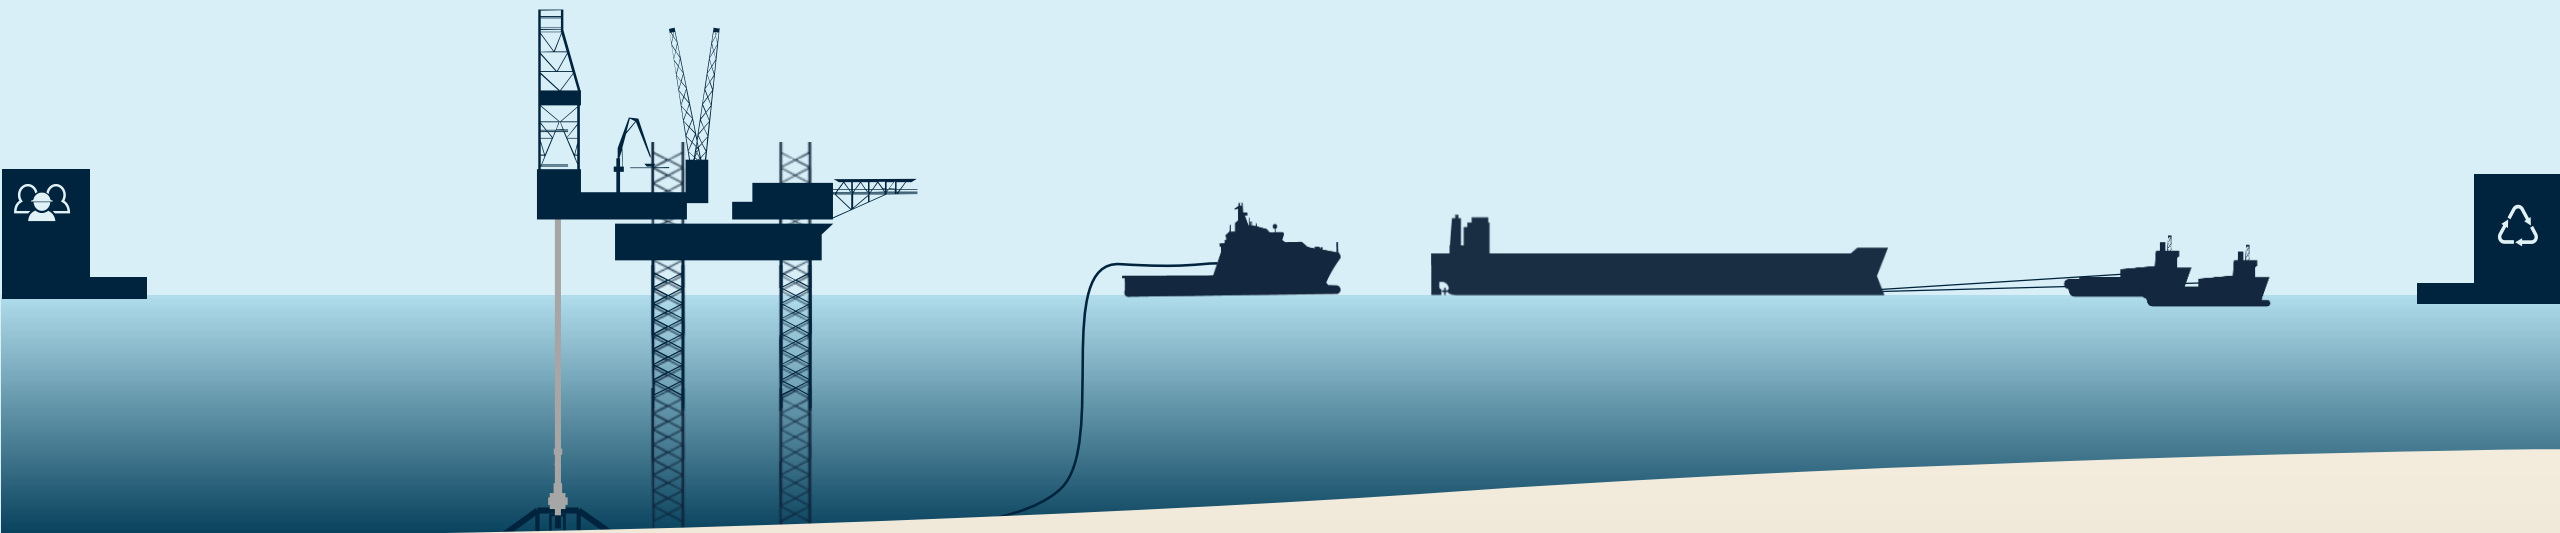

Decommissioning is a **cost** with no return after investments

2

After decade of oil and gas production, we need to **take responsibility** for what we leave behind

3

Strong collaboration between stakeholders is needed, where we have the same baseline

Constantly rethinking decommissioning to maximise value and sustainability

The Cost Calculator brings....

The screenshot shows the Maersk Decom website's Cost Calculator page. The header includes the Maersk Decom logo and navigation links: HOME, ABOUT, SERVICES, CAREERS, COST CALCULATOR, CONTACT US, and MEDIA ROOM. The main content area is divided into three sections:

- Left Section:** A dark blue background with the text "Cost Calculator" and "Maersk Decom's easy-to-use cost calculator for decommissioning in the North Sea". Below the text is an illustration of a person standing next to a large calculator.
- Middle Section:** A white background with the heading "Location". Below the heading is a dropdown menu titled "Choose a country" with the following options: "United Kingdom (UK)", "Norway (NO)", "Netherland (NL)", and "Denmark (DK)". Below the dropdown is a map of the North Sea region.
- Right Section:** A white background with text explaining the calculator's purpose and providing contact information for Tim Clay.

At the bottom of the page, there are navigation buttons: "PREVIOUS" with a left arrow and "NEXT" with a right arrow.

Accelerate decommissioning in the North Sea

Simpler setup

More transparency

More collaboration

Thank you

No resource wasted
